A day in the life of

Analyze

Evaluate

Advise

You **evaluate** improvements by creating, executing, and managing functional and non-functional test cases.

You document your test cases and communicate the test results.

You work closely with our developers, technical solution engineers and sales executives to identify the needs of our customers.

You progress in your career by continuously learning and expanding your skillset.

You **analyze** new features, changes and fixes with an eye for quality.

You **advise** our developers on how to continuously improve the overall client experience.

You follow up on reported issues and anticipate potential risks.

You strive to enhance the testing process by using structured testing techniques and test automation.

Hi! My name is [your name here] I'm the new Testing & Quality Engineer

[Paste picture here]

[Paste picture here]
